

Supplementary Fig. S3 |
Single-cell cohort composition and frozen annotation structure in GSE182434

A GSE182434 cohort composition and primary-analysis boundary

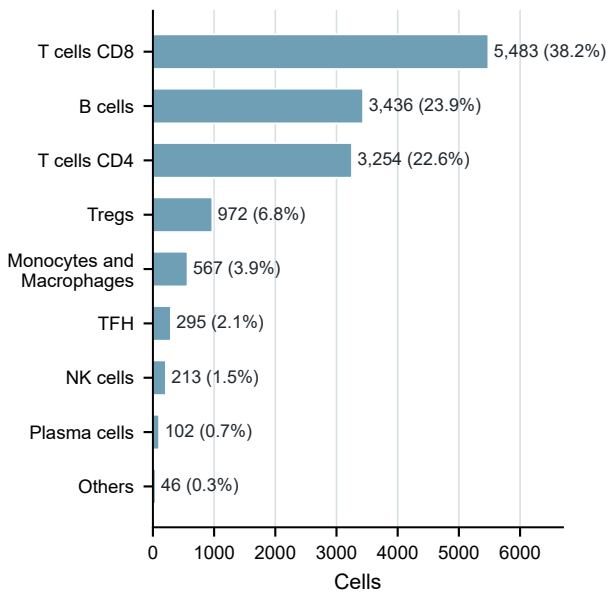

Primary single-cell analyses were restricted to the DLBCL subset.

B Cell representation across DLBCL patients and samples

Cells are nested within patients and samples; counts are descriptive.

C Cell-type composition of the primary DLBCL subset

D Frozen cell-type composition across DLBCL patients

	DLBCL002	DLBCL007	DLBCL008	DLBCL111
B cells	1,651	827	462	496
T cells CD8	1,177	302	1,605	2,399
T cells CD4	1,720	131	437	966
Tregs	429	135	150	258
TFH	209	14	0	72
Monocytes and Macrophages	214	15	292	46
NK cells	69	5	17	122
Plasma cells	65	0	37	0
Others	0	5	0	41

Color: within-patient proportion | Labels: raw cell counts
